

Recommendations from Ex aequo

- 1 That the Quebec government enact a framework law on the right to food.
- 2 That the Quebec government pass a law on universal accessibility.
- 3 That the Quebec government improve home-care services by increasing the number of service hours and expanding the range of services offered to make it easier for people facing disability to feed themselves.
- 4 That the Quebec government expand its coverage for the reimbursement of assistive devices and eliminate its “one-time grant” policy for assistive devices essential for eating.
- 5 That the Quebec government increase funding for the home-adaptation program and offer a higher reimbursement amount for home-modification work.
- 6 That the Government of Quebec implement the Human Rights and Youth Rights Commission’s recommendations to ensure that the rights of people facing disability are respected in education and employment.
- 7 That the Canadian and Quebec governments improve the benefits and tax incentives that help increase the income of people facing disability and offset disability-related expenses, and that they broaden the eligibility criteria for these social programs and tax measures.
- 8 That paratransit services remove the limit on the number of bags per person and the requirement that a person carry their own personal belongings when it comes to food.
- 9 That regional concertation bodies on food security for people facing disability be established throughout Quebec.
